

Adaptation Hubs

Are EU countries prepared for climate impacts?

Supporting Coordinated Climate Resilience

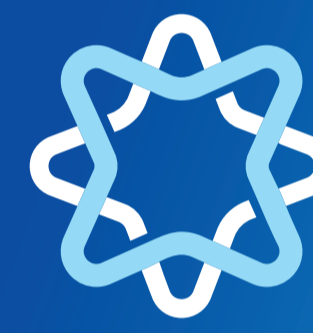

AdaptationHubs is an EU-funded flagship initiative of the EU Mission on Adaptation to Climate Change, supporting countries work better together to prepare for climate change. The project is building a network of 27 National Adaptation Hubs across Europe – one in each Member State – to improve coordination, share solutions, and strengthen the way climate risks are managed at national and local levels.

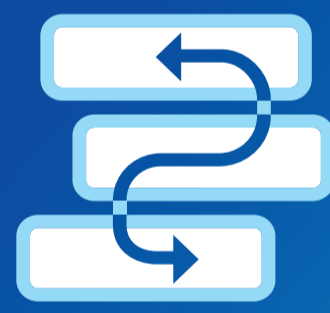

Central Support Facility

27 National Adaptation Hubs (NAHs)

Grouping & twinning system

Stronger multilevel coordination

Better, aligned adaptation plans

19

peer-learning and capacity-building activities

54

regional twinning partnerships support by NAHs

135

working sessions coordinated through national hubs

Funded by the European Union
