

# Adaptation Hubs

## Are EU countries prepared for climate impacts?

### Supporting Coordinated Climate Resilience

AdaptationHubs is an EU-funded flagship initiative of the EU Mission on Adaptation to Climate Change, supporting countries work better together to prepare for climate change. The project is building a network of 27 National Adaptation Hubs across Europe – one in each Member State – to improve coordination, share solutions, and strengthen the way climate risks are managed at national and local levels.

Central Support Facility

27 National Adaptation Hubs (NAHs)

Grouping & twinning system

Stronger multilevel coordination

Better, aligned adaptation plans

**19**

peer-learning and capacity-building activities

**54**

regional twinning partnerships support by NAHs

**135**

working sessions coordinated through national hubs

Funded by the European Union
